Art Unit: 3712

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-7, drawn to an archery bow with a sight pin block having sight pins at fixed distances, classified in class 124, subclass 87.
- II. Claims 8-12, drawn to an archery bow having a sight pin block which is mounted to an opening in the riser by means of a moveable wedge, classified in class 124, subclass 87.

The inventions are distinct, each from the other because of the following reasons: Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as use in a sight pin block without the mounting wedge means. See MPEP § 806.05(d).

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to

Art Unit: 3712

be examined even though the requirement be traversed (37 CFR 1.143)
